Independent Investigation into East Kent Maternity Services (IIEKMS)

1. Publication of the Report

1.1 The report of the Independent Investigation into Maternity and Neonatal Services in East Kent was shared with families on the morning of 19 October 2022, in line with the Families First Principles.

The Report was published in Parliament on the same day and a statement given the following day.

On the day of publication, on behalf of the Trust, the Chief Executive gave the following statement:

"I want to say sorry and apologise unreservedly for the harm and suffering that has been experienced by the women and babies who were within our care, together with their families, as described in today's report.

These families came to us expecting that we would care for them safely, and we failed them.

We must now learn from and act on this report; for those who have taken part in the investigation, for those who we will care for in the future, and for our local communities. I know that everyone at the Trust is committed to doing that.

In the last few years we have worked hard to improve our services and have invested to increase the numbers of midwives and doctors, in staff training, and in listening to and acting on feedback from the people who receive our care.

While we have made progress, we know there is more for us to do and we absolutely accept that. Now that we have received the report, we will read it in full and the Board will use its recommendations to continue to make improvements so that we are providing the safe, high-quality care our patients expect and deserve.

I want every family – whether they contributed to the investigation or not – to know I am here to listen to them, to learn and to lead our Trust in acting on this report.

I would like to thank Dr Bill Kirkup and the investigation team for their work. Today, our thoughts remain with those who have shared their experiences. We are grateful to them."

- 1.2 This statement has been published on the Trust's website and shared widely, along with details of support available to current, past and future users of the service.
- 1.3 The report covers the review of the maternity care provided by the Trust to 202 families between 2009 and 2020. The report identifies four areas for action for this Trust and the NHS more widely:
 - 1. identifying poorly performing maternity units
 - 2. giving care with compassion and kindness
 - 3. teamworking with a common purpose, and
 - 4. responding to challenge with honesty

As well as a key recommendation specifically for the Trust, to accept the reality of these findings; acknowledge in full the unnecessary harm that has been caused;

and embark on a restorative process addressing the problems identified, in partnership with families, publicly and with external input.

- 1.4 Dr Kirkup states that these areas for action require a broader-based approach by a wide range of experienced experts.
- 1.5 The report also identifies that the NHS must become serious about measuring outcomes in maternity services. It recognises that there are obvious difficulties, given that pregnancy and childbirth are physiological in most cases and poor outcomes less common, but this must not become an excuse. The report says meaningful, risk-sensitive outcome measures can be found, as they have been in other specialties.
- They can be used, not to generate meaningless league tables, but to identify results that are genuine outliers. The report says: "Only in this way can we hope to detect the next unit that begins to veer off the rails before widespread harm has been caused, and before it has had to be identified by families who have suffered unnecessarily. There is work under way in the NHS but it needs further support and direction and the approach must be mandatory, not optional."

2. Findings of the investigation

- 2.1 The panel found that too often clinical care was suboptimal and led to significant harm, we failed to listen to the families involved, and acted in ways which made the experience of families unacceptably and distressingly poor.
- 2.2 Individual and collective behaviours were visible to senior managers and the Trust Board in a series of reports right through the period from 2009 to 2020, and lay at the root of the pattern of recurring harm. At any time during this period, these problems should have been acknowledged and tackled effectively. There were eight clear separate opportunities when that could and should have happened.
- 2.3 Had care been given to the nationally recognised standards, the outcome could have been different in 97, or 48%, of the 202 cases assessed by the Panel, and the outcome could have been different in 45 of the 65 baby deaths, or 69% of these cases. The Panel had not been able to detect any discernible improvement in outcomes or suboptimal care, as evidenced by the cases assessed over the period from 2009 to 2020.
- 2.4 Nor was the harm restricted to physical damage. Chapter 3 of the report sets out the equally disturbing effects of the repeated lack of kindness and compassion on the wider experience of families, both as care was given and later in the aftermath of injuries and deaths.

3. Response to the publication of the Report

- 3.1 The Trust apologises unreservedly for the harm and suffering experienced by women, babies and their families and is grateful to those families who have shared their experiences as part of the Investigation.
- 3.2 For any families whether they contributed to the investigation or not, there is an open invitation for them to contact the Trust. At the meeting with families who participated in the investigation held by Dr Bill Kirkup on the morning of 19 October 2022, details of how to do this were made available.

- 3.3 A letter was sent on Thursday 13 October 2022 to all families who are currently registered with the Trust for maternity care, notifying them of the intended publication of the Report, providing contact details in the event of any immediate concerns or questions. The advice included details of the Maternity Enquiries line both telephone number and email address.
- 3.4 The publication of the Report has been widely reported on local, regional and national media.
- 3.5 The families' enquiry line had by 10am on 20 October 2022 received 15 enquiries.
- 3.6 We recognise that there has also been an impact on staff in Maternity and Neonatal services and across the organisation and support has been put in place as well as a number of staff briefings. We have also shared how staff can raise concerns.
- 3.7 The Trust accepts the findings of the Independent Investigation in full.

4. Areas for action

The four areas for action each have supporting recommendations and there is an additional specific recommendation for the Trust. The recommendations are as follows:

- 1) Monitoring safe performance finding signals among noise:
 - The prompt establishment of a Task Force with appropriate membership to drive the introduction of valid maternity and neonatal outcome measures capable of differentiating signals among noise to display significant trends and outliers, for mandatory national use.
- 2) Standards of clinical behaviour technical care is not enough:
 - Those responsible for undergraduate, postgraduate and continuing clinical education be commissioned to report on how compassionate care can best be embedded into practice and sustained through lifelong learning.
 - Relevant bodies, including Royal Colleges, professional regulators and employers, be commissioned to report on how the oversight and direction of clinicians can be improved, with nationally agreed standards of professional behaviour and appropriate sanctions for non-compliance.
- 3) Flawed teamworking pulling in different directions:
 - Relevant bodies, including the Royal College of Obstetricians and Gynaecologists, the Royal College of Midwives and the Royal College of Paediatrics and Child Health, be charged with reporting on how teamworking in maternity and neonatal care can be improved, with particular reference to establishing common purpose, objectives and training from the outset.

5

- Relevant bodies, including Health Education England, Royal Colleges and employers, be commissioned to report on the employment and training of junior doctors to improve support, teamworking and development.
- 4) Organisational behaviour looking good while doing badly:
 - The Government reconsider bringing forward a bill placing a duty on public bodies not to deny, deflect and conceal information from families and other bodies.
 - Trusts be required to review their approach to reputation management and to ensuring there is proper representation of maternity care on their boards.
 - NHSE reconsider its approach to poorly performing trusts, with particular reference to leadership.
- 5) The key recommendation specifically for the Trust, and which the Trust accepts, is to:
 - accept the reality of these findings; acknowledge in full the unnecessary harm that has been caused; and embark on a restorative process addressing the problems identified, in partnership with families, publicly and with external input.

5. Implementing the recommendations

- **5.1** Recommendations 1 4 are for the Trust to consider and for the NHS as a whole, its partners and regulators.
- 5.2 The Trust Board must also own and take forward recommendation 5 and embark on a restorative pathway. As a first step the Board will seek the input of the Clinical Executive Management Group (CEMG) and in particular will reflect on a fresh bottom up, top down approach to build a culture of listening, kindness, excellence, openness and team working. This will require a Trustwide approach and action across the organisation and not just in maternity.
- 5.3 The view of CEMG and next steps will be shared and reported to the Board at its next meeting on 3 November 2022.
- The Board will support the restorative process and improvement programme and seek ongoing assurance that the right steps are being taken to identify 'what had gone wrong and what needs to be put right'.

6. Next Steps

- 6.1 The Board is asked to discuss this paper and to take account of the views of the Council of Governors in deciding the next steps, including working in partnership with families.
- **6.2** This discussion to be taken back to Clinical Executive Management Group (CEMG).
