Michael Jenkinson	20/02/2019 15:52	Decision-making member of staff	Lead Clinician Drugs & Therapeutics	Yes	Shareholding and other Ownership Issues	Historically my brother held global executive positions with Allergan and then Kite pharmaceuticals but was made redundant from both companies following corporate takeovers. He has communicated to me in August 2018 that his current shareholding in Allergan is considerably less than 5%, and that his holding and share options in Kite pharmaceuticals was brought out in cash by Gilead Sciences. In September 2018 my brother joined the board of directors of AIVita Biomedical Inc. This California based company does not market to the NHS but is developing stem cell based technology with potential oncology and retinal disease applications (phase 2 trial stage in oncology applications at time of notification). It has a commercial product Alpha 2-HS Glycoprotein (Fetuin®) used in skin cosmetic applications (creams).	13/09/2018 00:00		I have undertaken to withdraw from any decision making where potential or actual conflict might arise, be it in my Trust role, or my policy associated roles with the Kent and Medway CCGs and NHS England. This potential interest has been recorded by NHS England (having been notified to Medical Director NHS England (South) as it then was).
