

# Speech Screen

# What is it for?

- This is an online screening tool to be used by parents/carers and educational and/or health professionals alongside the referral form for Children's Speech and Language Therapy. It is not a comprehensive speech assessment.
- It is used to help ensure that referrals are appropriate and provide information prior to the initial assessment.

# How to use it?

- 1) Print the record form and make sure that this is to hand.
- 2) Make sure that you are in a quiet setting with no distractions.
- 3) Show the picture to the child and wait.
- 4) If they do not say the target word (listed on the record form) then name the picture for them and see if they can repeat the word.
- 5) If they are struggling to stay seated and join in, take a break.

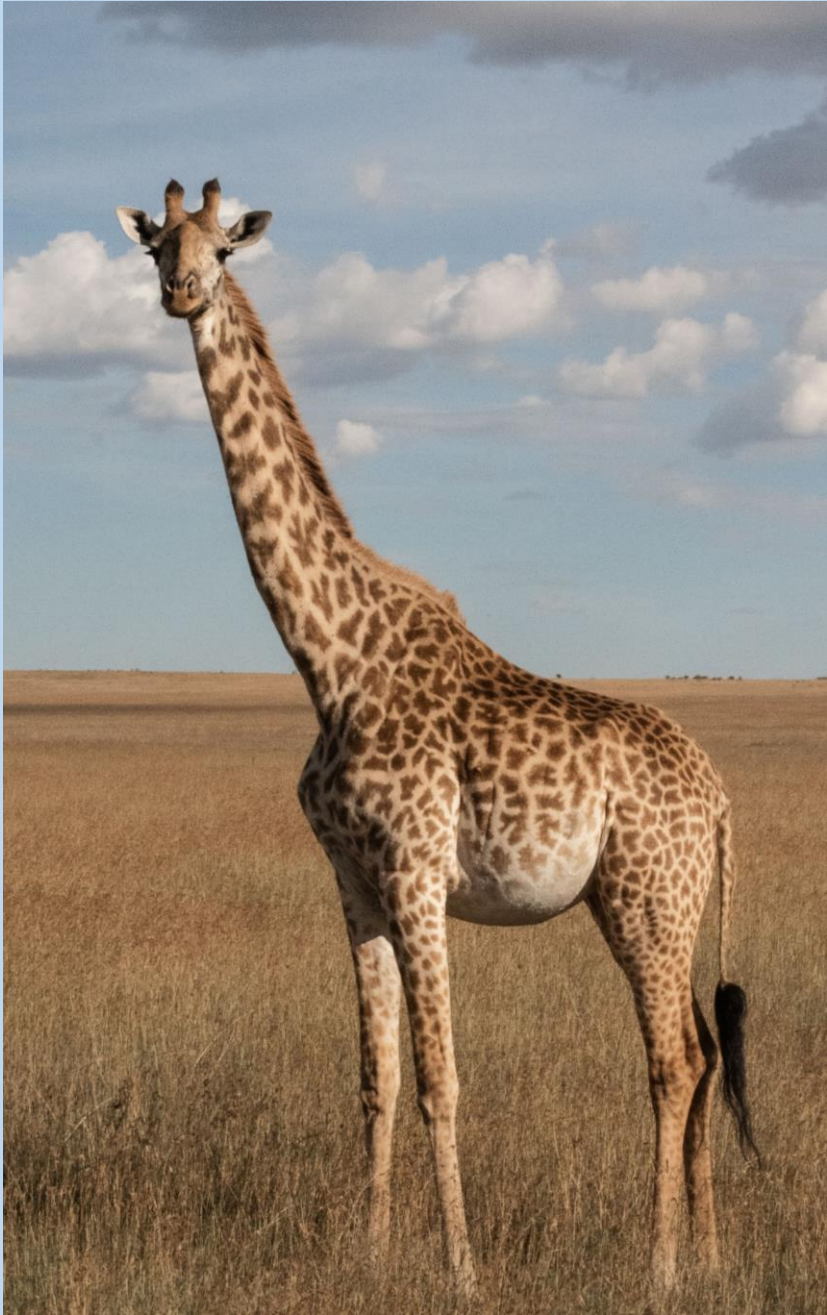

Well done! You've finished!
